

## How to make an 'Around the World in 80 Days' Hot Air Balloon

### What you will need:

- Coloured paper/card
- String
- Glue
- Scissors

1. Fold a piece of card in half and draw half a balloon shape on the folded centre section.

2. Cut around the balloon so you have one full balloon template. (Note, if this is too difficult you can always print out a balloon template from online to cut around).

3. Then, blue-tack the cut out balloon to another piece of card and cut around. This helps to stop it moving as you cut. Do this until you have 6 cut out balloons.

4. Fold each balloon in half.

5. Glue one side of a balloon cut out and stick to another balloon side. Do this for all of the balloon cut outs. On the last one make sure you glue both sides.

6. Cut out a rectangle 2cm by 5cm. The roll it up and glue the sides together. This will be the basket.

7. Get 2 pieces of string and glue to each side of your basket. If it doesn't hold you can also use sellotape. Then glue the two ends to the inside of the bottom of the basket.

8. Finally, glue a piece of string to the top of the hot air balloon so you can hang it in your room.
